DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Anderson (US-5,986,675) discloses a process for creating a 3D computer animated movie or animated sequence of images. This invention allows a user to "describing the object region data using the conversion parameter and information on the reference object region." The user also moves the actor along any arbitrary path defined by the user thus "approximating a time-series variation of the conversion parameter and describing the object region data using an approximate function parameter." However, Anderson fails to disclose specifying one of the frames as a reference frame and specifying at least one object region of the reference frame as the reference object region. Anderson also lacks the conversion parameters as seen in figure 17 of Hori. A further search was conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
